The management at Seabreeze Amusement Park, 4600 Culver Road in Rochester, NY, is proud to announce the 2019 update of the Soak Zone in the waterpark. Guests can slide down the new "Pipeline" where they will stream through an enclosed body flume and finish with a big splash. Take bigger turns and wider curves on the new "Twister" open body slide. Plus, enjoy all your favorites like the aqua blasters and the water cannons. Get completely drenched by the big dumping bucket!

The Soak Zone is part of Seabreeze's waterpark, with fun for all ages in a world of water. Slide down the Hydro Racer, lounge in the Lazy River, enjoy the Wave pool or unwind in the shade to stay cool. The Soak Zone's active, aquatic atmosphere combined with animated fountains will keep guests cool and refreshed in the hot summer sun, when in need of a recharge from all of the fun. For more details about Seabreeze, visit the park's website at [www.seabreeze.com](http://www.seabreeze.com). Come get your summer!
