Seabreeze Fun & Safety Guide

This guide is designed to give you information about the park's policies and to assist you in planning your visit to Seabreeze. Please review this information; if you have any additional questions or require assistance, visit the Guest Services building.

Safety is our #1 concern. The park is committed to providing a safe, fun-filled environment for our guests - and we strictly enforce all state and manufacturer regulations. Also please note the rules and regulations posted around the park and at the attractions. These rules are in place for safety's sake; please follow them to ensure a safe, enjoyable visit.

General Information

Guest Services: Please visit the Guest Services building, located just next to the carousel, to speak to someone about guest services. Or ask one of our park employees - they'll point you in the right direction.

Motorized Scooters & Strollers: Motorized scooters, strollers, and wagons are available for daily rental on a limited, first come, first served basis. You must have a driver's license to rent these items. Please ask at the gate about rentals.

First Aid: A medic is always on duty to provide first aid. If you have a medical emergency, please notify a park employee who will call for assistance. The park's first aid office is located in the Guest Services building.

Lost and Found: All items found at the park are turned in at the Guest Services building. If you lose an item while on a ride, we will search for the item as soon as possible, but an immediate search may not be possible. Please visit Guest Services to report any lost items; leave your name and number in case your item is found after you leave the park.

The waterpark closes before the rest of the park and some areas will be closed off. Items left in those areas will be set outside the locked waterpark gates. At park closing time, items are taken to Lost & Found.

Seabreeze is not responsible for any personal belongings; do not leave any items unattended. For your safety, rent a locker located in the waterpark.

Restrooms: Restrooms are located between the Carousel and pizza stand; between the Wave Swinger and the Bumper Cars; and in the waterpark bathhouse.

Parking: Parking is free at Seabreeze. A limited number of spots for guests with disabilities are available first-come first-served, and are located closest to the gates. For further assistance in finding a spot, please ask an attendant.

Service Animals: A service animal - a dog or miniature pony that has been trained to do work or perform tasks for the benefit of a guest with a disability - is permitted in the park. Comfort animals are allowed in the park but not on rides. Animals must be leashed and under the owner's control at all times. Animals may not go on any attraction where their presence might jeopardize the safety or well-being of another guest; speak to Guest Services for more details. If you plan to ride, please bring someone to care for your animal; they cannot be left unattended or with a park employee. Owners must clean up/dispose of waste.

Rain Policy: If it rains on the day of your visit, some attractions may close temporarily. If park management determines that a majority of rides have been closed for more than one full hour due to weather, rain checks will be offered. It must be still raining in order to get a rain check, you must still be at the park, and all members in your party must be present to receive rain checks. You must leave the park upon receipt of the rain check. When the rain stops and the rides re-open, the distribution of rain checks will end. If it rains later on in the day, the process will begin again: management will determine if a majority of rides have been closed for another full hour, and will issue rain checks. No refunds. Group food service provided by Seabreeze in the picnic groves will continue during inclement weather in accordance with their pre-arranged schedule.

The Following are Not Allowed In The Park:

- No alcoholic beverages.
- No audio devices, except with the use of headphones.
- No glass containers.
- No weapons or sharp objects.
- No running, unruly behavior, profanity and obscene gestures.
- No bikes, skateboards or other balanced vehicles.
- No smoking, except in designated areas. No marijuana allowed.
- No grills or public grilling of food.
- No pets or other animals except service animals (see above).

Adult Chaperone Policy: Every day of the week, guests aged 17 and under (or under 21 on School Group Days) must be accompanied by an adult chaperone. Everyone, including the chaperone, must buy a ticket or show their season passport photo ID to enter the park. An adult chaperone is a family member, guardian or other supervising adult over the age of 21 with valid ID, including a photograph and date of birth. Each adult chaperone can accompany up to five youths, must be present at the time of entry, and remain within the park for the duration of their party's visit. Those near the age of 18 will be asked to show valid photo identification with date of birth upon arrival. Valid ID types include driver's license, non-driver ID card, college ID, passport, visa or military ID.

Food Allowed & Public-Use Picnic Tables: You are allowed to bring food and non-alcoholic beverages into the park, but no glass containers or knives. A few tables are located between the Flume and the Lazy River, and also by the Wave Pool. Tables are offered on a first-come, first-served basis. The park cannot guarantee the availability of a picnic table on any given day. Tables located near the park food outlets are reserved for patrons of the food stand. Public picnicking at those tables is not allowed.

Food Allergies: Despite taking precautions, cross-contact with peanuts, tree nuts, soy milk, eggs, wheat, fish or shellfish can occur in food production areas. Please ask a staff member if you need information on specific allergies.

Dress Code: Our dress code is designed to maintain the park's safe family atmosphere. Shirts, shorts/pants & shoes must be worn at all times, except in the waterpark. When the shirt policy is in effect, then tops must be worn at all times. Clothing or tattoos with inappropriate language or graphics are not permitted. Face coverings and costumes/disguises that conceal identity are prohibited. Medical masks and religious head coverings are exempt.

Smoking: Seabreeze is smoke-free. You may smoke or vape only in a few designated areas. Smoking marijuana is not permitted at any time in the park.

Bag Checks & Guest Scanning: For your safety, all guests are scanned at the admission gates and bags are inspected.

No Grilling: The cooking of food is not permitted in our public groves or in the parking lots. Grills are not allowed nor are they available in the public groves.

Re-entry: Guests may leave the park and return that day, provided they get a hand stamp at the gate and show it for re-entry through the scanning area.

Riding The Rides & Water Attractions

Rider Responsibility Law: New York State Law states "... there are inherent risks in the participation in or on the amusement device. Since it is recognized that the participation in or on the device may be hazardous regardless of all feasible safety measures that can be undertaken by the device owner or operator there is a duty for the patrons to become apprised of the warnings and the risks inherent in participation in or on such amusement device, patrons shall familiarize themselves with the posted safety warnings so that they may make an informed decision of whether to participate in or the device notwithstanding the risks." (NYS Labor Law Article 27 Sec.870e). For more information, visit www.ridesafeny.com.

Fun & Safety Guidelines: Certain attractions have restrictions based on height and/or size as well as physical or medical conditions. Signs are posted at the entrance to each attraction that provide guidelines about restrictions and

safety. Please follow these rules to ensure a safe experience for you and others. Decide before you ride. Watch the ride in operation and read all warnings before you determine whether a particular ride is really for you. Restrictions are subject to change at any time without notice.

Guests with recent surgery, heart problems, high blood pressure, neck or back problems, seizures, pregnancy, or have any other condition that may be aggravated by riding must use discretion in selecting which rides to ride. You know your medical history and any restrictions or limitations – the park does not. It is up to you to use good judgment when deciding which rides to ride. If you suspect your well-being could be at risk, or you could aggravate a pre-existing condition, do not ride the ride.

Evacuation of Rides: Be aware that, although remote, there is always the possibility that a sudden, unexpected ride stoppage may occur. If that does happen, riders may be required to evacuate the ride over catwalks or travel down steeply inclined ramps or tight steps. Anyone unable to evacuate may need to wait, restrained in their seats for extremely long periods of time, until assistance arrives. Please consider this before deciding to ride.

Securing Loose Items: For safety's sake, all loose items must be left with a non-riding companion or stored in a park rental locker. Employees are not allowed to care for your personal belongings, so please don't ask them to watch your things. Seabreeze is not responsible for any lost, stolen or damaged items.

Camera Policy: For safety's sake the use of cameras - including cell phones - while riding any park attraction is prohibited. Any such equipment must be treated as a loose item and be secured or left with a non-riding companion.

Line Jumping: You must enter the line at the end. Guests are not allowed to leave and return for any reason, hold a spot for someone else, join someone already in line, jump any fences or chains, or cut through the line. Violations of these rules may result in your loss of ride or park privileges. Please respect others and don't line jump.

Restraining Guests of Exceptional Size or With a Disability: All passenger restraint systems, including lap bars, shoulder harnesses and seatbelts, must be positioned and fastened properly to allow guests to ride. Due to rider restraint system requirements, guests of exceptional size may not be accommodated on some of our rides. Those whose size does not allow for the proper use of safety measures and devices are not permitted. Those with a physical and/or mental disability such that they cannot use the safety devices properly are not permitted to ride.

Accessibility: In order to go on an attraction you must meet all restrictions, be mentally alert, able to hold on as required without any assistance, be able to enter and exit a vehicle without help from Seabreeze staff, utilize all safety devices & restraints, and safely evacuate the ride if needed. In order to ride the waterslides, guests need to be able to ascend slide tower steps without assistance from park staff. Seabreeze management reserves the right to refuse any guest access to an attraction which management deems unsafe for the individual. Park staff is not permitted to, nor trained to, physically assist guests onto or off the attractions.

Visiting with an Assisting Aide: Guests with disabilities may require an aide during a visit to Seabreeze. An aide who is aware of your needs can assist with maneuvering through the park, transferring on attractions, providing assistance in the event of an evacuation and remaining with a service animal if needed. Park staff is not permitted or trained to physically assist guests onto or off the attractions. You may want to consider bringing an aide when coming to the park. There is no special admission price for people with disabilities; if the guest is required to have an aide, that aide receives complimentary admission. To use this option, please visit the Gate Services window at the admission gates.

Wheelchair Access to an Attraction: A guest in a wheelchair and one assisting aide may enter most attractions through the exit gate. Signs are posted at each attraction showing where to enter. Please wait for the ride operator to indicate that it is safe to enter before proceeding. Immediate seating may not be available, but you will be accommodated as soon as possible. Please inform the operator if you intend to ride with other specific guests who are waiting in the queue line.

Casts: Guests wearing properly restrained casts may ride the rides and water attractions; provided that all ride safety requirements are met.

Artificial Limbs & Amputees: Guests who are amputees or those with artificial limbs may be unable to participate on some rides due to the inability to be properly restrained during the ride. Please securely lock or remove prostheses before boarding. For more details, refer to the following *Ride Specifications*.

Sign Language Interpretation: An interpreter will be provided upon written request at least one week prior to your visit. Please send an email to info@seabreeze.com and include your name, phone number, date of your visit and details on what information needs to be interpreted.

Please Note: *the policies, guidelines and other information contained in this document are subject to change at any time. This document does not include all park policies, and should not be considered fully comprehensive. If you have additional questions, please ask. This booklet is intended as an overview guide, and all information is meant to assist the guest with their visit to Seabreeze.*

Ride Specifications

Balloon Race

A rotating circular ride, where passengers seated in a basket will ascend to a height of approximately 30 ft. Riders can spin their own baskets if they choose. Riders should expect mild centripetal forces.

Height Requirement: Minimum 38" tall. Those under 42" tall must be accompanied by a Responsible Person*.

Physical Requirement: A, C, D, E, F (see symbols below). Rider must be able to sit up unsupported, hold on, and be restrained by a seatbelt.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Barnstormer

A low speed, circular-motion ride for young children. Riders control a lever that allows them to maneuver the plane up and down.

Height Requirement: Minimum 36" tall, maximum 55" tall.

Physical Requirement: A, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a seatbelt.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Bear Trax

A junior roller coaster with quick drops, twists and turns, and forces from all directions. The ride makes two rotations around the track. Note: adults w/children may not ride in the back seat.

Height & Size Requirement: Minimum 36" tall. Guests over 58" must ride with a child in their party. Ride may not accommodate guests of exceptional size.

Physical Requirement: A,B,D,E,F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a seatbelt and lap bar. Rider must have 2 legs to the knee.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle. CAUTION: this attraction is *not recommended* for guests using wheelchairs, due to the extreme difficulty and extended duration of time needed to evacuate the ride in the rare event of a ride stoppage. Refer to "Evacuation of Rides", page 4.

* A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.

Bobsleds

A roller coaster with steep drops, quick twists and turns, and strong forces from all directions.

Height Requirement: Minimum 38" tall. Riders 38" to 48" tall must be accompanied by a Responsible Person*.

Physical Requirement: A,B,C,D,E,F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a lap bar and seatbelt. Rider must have 2 legs to the knee.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle. CAUTION: this attraction is *not recommended* for guests using wheelchairs, due to the extreme difficulty and extended duration of time needed to evacuate the ride in the rare event of a ride stoppage. Refer to "Evacuation of Rides", page 4.

Bumper Cars

Drivers bump into each other while traveling one-way in an oval pattern. Riders should expect strong forces and frequent bumps from all directions.

Height & Size Requirement: Minimum 42" tall to ride, 50" to drive. Those 42" - 50" tall must ride as a passenger, with a Responsible Person* driving. Ride may not be able to accommodate guests of exceptional size.

Physical Requirement: A,B,C,D,E,F (see symbols below). Rider must be able to sit up unsupported, hold on, brace themselves and be restrained by a lap bar.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Carousel

A circular motion ride with horses and chariots. Some horses go up and down.

Height Requirement: Those under 42" tall must be accompanied by a Responsible Person*.

Physical Requirement: A,F (see symbols below). Rider must be able to sit up unsupported and hold on. An adult may stand alongside and assist by holding a small child riding a horse.

Wheelchair Access: Enter through Exit. A wheelchair ramp is available. Wheelchair space is available in front of a chariot.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

Flying Turtles

A children's circular ride. Guests ride in a turtle-shaped car along a circular track with minor rocking motion and up & down patterns.

Height Requirement: Maximum 55" tall. No infants; children must be able to walk on their own to ride.

Physical Requirement: A, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a lap bar.

Wheelchair Access: Use the Entrance. Transfer to ride vehicle.

Jack Rabbit

A fast-paced roller coaster with steep drops, sharp corners and a dark tunnel. Riders face strong forces from all directions.

Height & Size Requirement: Minimum 48" tall. Ride may not be able to accommodate guests of exceptional size.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit upright, stabilize themselves, and be restrained by a lap bar. Rider must have 2 legs to the knee.

Wheelchair Access: Enter at the south end of station. Transfer to ride vehicle.

CAUTION: this attraction is *not recommended* for guests using wheelchairs, due to the extreme difficulty and extended duration of time needed to evacuate the ride in the rare event of a ride stoppage. Refer to "Evacuation of Rides", page 4.

Kiddie Boats

A low-speed, circular motion boat ride for young children.

Height Requirement: Maximum 55" tall.

Physical Requirement: A, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a safety chain.

Wheelchair Access: Use the Entrance. Transfer to ride vehicle.

Kiddie Swings

Children ride in a circular motion on individual swings.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

Height Requirement: Minimum 36" tall. Maximum 55" tall.

Physical Requirement: A, C, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a safety strap. Must have 2 legs to the knee.

Wheelchair Access: Use the Entrance. Transfer to ride vehicle.

Log Flume

A log flume water ride with strong forces in all directions, splashing water and a final steep drop.

Height Requirement: Minimum 38" tall; those under 48" must be accompanied by a Responsible Person* who must sit in same seat w/person 38" - 48".

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit up unsupported and hold on. Rider must have 2 full legs, leg prostheses accepted if secured.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle. CAUTION: this attraction is *not recommended* for guests using wheelchairs, due to the extreme difficulty and extended duration of time needed to evacuate the ride in the rare event of a ride stoppage. Refer to "Evacuation of Rides", page 4.

Music Express

A rapid-speed circular ride that goes backward and forward on a sloping path. Amplified music plays while riding. Strong forces from all directions.

Height & Weight Requirement: Minimum 48" tall. Ride may not be able to accommodate guests of exceptional size.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a lap bar. Rider must have 2 full legs and the ability to hold on.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Revolution 360

Riders sit on motorcycle-style seats on a rotating platform that travels back & forth along a half-pipe track. Strong forces from all directions.

Height & Weight Requirement: Minimum 48" tall. Ride may not be able to accommodate guests of exceptional size.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a back restraint. Rider must have 2 full legs and the ability to hold on.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Scenic Train

A gentle train ride that travels a circuit over and around the Log Flume pond.

Height Requirement: Riders under 42" tall must be accompanied by a Responsible Person*.

Physical Requirement: F (see symbols below). Rider must remain seated at all times and hold on.

Wheelchair Access: Enter through access gate next to the Screamin' Eagle. Transfer to ride vehicle.

Screamin' Eagle

An inverting ride that suspends riders upside down through several rotations before switching direction. Riders should expect strong gravitational forces.

Height & Size Requirement: Minimum 48" tall. Ride may not be able to accommodate guests of exceptional size.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by an overhead restraint. Rider must also secure the safety strap. Must have 2 full legs and 2 full arms.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Sea Dragon

A giant pendulum ride that swings back and forth, taking riders up into the air. Riders should expect strong gravitational forces and swinging motion.

Height Requirement: Minimum 38" tall. Those under 48" must be accompanied by a Responsible Person*.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a lap bar. Rider must have two full legs and the ability to hold on.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

Spring Ride

Riders slowly ascend to the top of a 24-foot tower, then suddenly drop down. The up-and-down sequence repeats. Riders feel gravitational forces.

Height Requirement: Minimum 38" tall. Those under 42" must be accompanied by a Responsible Person*.

Physical Requirement: A, B, C, D, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained with an overhead restraint. Rider must also secure the safety strap. Must have two full legs and two full arms.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Star Rockets

A low-speed, circular motion children's ride.

Height Requirement: Maximum 55" tall.

Physical Requirement: A, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a seatbelt.

Wheelchair Access: Use the Entrance. Transfer to ride vehicle.

T-Birds

A children's miniature car ride that travels on a winding track back to the start.

Height Requirement: Maximum 55" tall.

Physical Requirement: A, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a seatbelt.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Tilt-A-Whirl

A free-spinning, circular ride with moderate to strong rotational forces.

Height Requirement: Minimum 38" tall. Those under 46" must be accompanied by a Responsible Person*.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a lap bar.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

Time Machine

A vertical rotational ride with moderate to strong forces. Riders reach heights of 27 feet in a 20-person gondola which remains level during the ride.

Height Requirement: Minimum 44" tall. Maximum 78" tall.

Physical Requirement: A, B, C, D, E, F, G (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by an overhead restraint.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Twirlin' Tea Cups

A spinning, circular ride. Riders control amount of spin.

Height Requirement: Riders under 36" tall must be accompanied by a Responsible Person*. No infants allowed - children must be able to walk on their own.

Physical Requirement: A, C, D, F (see symbols below). Rider must be able to sit up unsupported and hold on.

Wheelchair Access: Enter through access gate. Transfer to ride vehicle.

Wave Swinger

A swing ride with chairs that travel in a circular path, tilts slightly and lifts riders up into the air. Riders should expect a variety of motion forces.

Height & Size Requirement: Minimum 44" tall. Ride may not accommodate guests of exceptional size.

Physical Requirement: A, B, C, D, E, F, G (see symbols below). Rider must be able to sit up unsupported, hold on and be restrained by a safety bar. Rider must be able to secure the safety strap. Rider must have 2 legs to the knee.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

Whirlwind

A steel, spinning roller coaster where riders sit back-to-back and experience steep drops, tight and angled curves. Strong forces come from all directions.

Height & Size Requirement: Minimum 48" tall. Ride may not be able to accommodate guests of exceptional size.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit upright, hold on and be restrained by a lap bar. Rider must have 2 full legs

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

and the ability to hold on.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle. **CAUTION:** this attraction is *NOT RECOMMENDED* for guests using wheelchairs, due to the extreme difficulty and extended duration of time needed to evacuate the ride in the rare event of a ride stoppage. Refer to “Evacuation of Rides”, page 4.

Windstarz

An interactive family ride that creates an experience similar to hang gliding. Two riders control a lever which will raise, lower, and tilt the rider position.

Height Requirement: Minimum 42” height, guests under 48” must be accompanied by a responsible person.

Physical Requirement: A, C, D, E, F (see symbols below). Rider must be able to sit upright, hold on, and secure safety strap. Rider must have 2 legs to the knee.

Wheelchair Access: Enter through Exit. Transfer to ride vehicle.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

Waterpark Specifications

Helix

Riders use single or double inner tubes. They go down a steep drop tunnel, into a giant bowl, and through a drop chute before exiting into a pool 4 feet deep.

Height & Size Requirement: Minimum 48" tall. Single tube rider weight limit 250 lbs. Double tube rider weight limit 400 lbs.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit up unsupported and hold on.

Wheelchair Access: Use the Entrance. Rider must ascend stairs.

Hydro Racer

A high-speed water slide where racers ride head-first on mats. They first go through a tube, then encounter a steep drop and splash into a shallow run-out.

Height Requirement: Minimum 42" tall.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to lie head-first and stomach-down on a toboggan-like mat, and hold on.

Wheelchair Access: Use the Entrance. Rider must ascend stairs.

Kiddie Slides

Two water slides for young children. One has a straight flume and the other is serpentine. They exit into a pool 18" deep.

Height Requirement: Maximum 55" tall.

Physical Requirement: A, F (see symbols below). Slider must be able to sit upright unsupported.

Wheelchair Access: Use the Entrance. Transfer to slide.

Lazy River

This is a 3-foot-deep slowly moving river where riders use inner tubes to float around a circuit. They encounter waterfalls and other water effects.

Height Requirement: Those under 38" must be accompanied by a Responsible Person*.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

Physical Requirement: A, F (see symbols below). Rider must be able to lie on an inner tube unsupported.

Wheelchair Access: Use the Entrance. Rider must negotiate several steps and board an inner tube. An assisting aide may accompany a rider by riding alongside on an inner tube or by walking in the river with the guest.

Reef Runners

A racing tube slide with one- and two-person tubes. Riders encounter quick drops, high-speed turns and changes in direction, ending in a run-off chute.

Height & Size Requirement: Minimum 42" tall; those under 48" must ride with a Responsible Person*. Individual rider weight limit 300 lbs. Combined weight limit 500 lbs. Scales are used at this attraction for verification.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit upright unsupported and hold on.

Wheelchair Access: Use the Entrance. Rider must ascend stairs.

Rip Tide Tube Slide

An open-air inner tube slide with one- and two-person tubes. Riders go through a series of quick turns and drops before exiting into a pool 4 feet deep.

Height & Size Requirement: Minimum 42" tall; those under 48" must ride with a Responsible Person*. Single tube rider weight limit 250 lbs. Double tube rider weight limit 400 lbs.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit upright unsupported and hold on.

Wheelchair Access: Use the Entrance. Rider must ascend stairs.

Soak Zone

Includes 3 children's slides: a two-lane open flume, a single twister and an enclosed tube. Riders exit into a shallow run-out. Other Soak Zone elements include water-blasters, squirt deck and dumping bucket.

Height Requirement: Twister: minimum 38" tall. Pipeline: maximum 55" tall.

Physical Requirement: A, F (see symbols below). Slider must be able to sit upright unsupported.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*

Wheelchair Access: Use the Entrance. Slider must ascend stairs. Other Soak Zone elements are accessible.

Tad Pool

A small water play area for young children, featuring a ramped zero-depth entrance and a cascading water umbrella. Maximum depth 1-1/2 ft.

Height Requirement: None.

Physical Requirement: A, F (see symbols below).

Wheelchair Access: Use the Entrance.

Vortex

A completely enclosed inner tube slide. Riders go through a series of quick turns, steep drops and a dark tunnel before exiting into a pool 4 feet deep.

Height & Size Requirement: Minimum 48" tall. Rider weight limit 250 lbs.

Physical Requirement: A, B, C, D, E, F (see symbols below). Rider must be able to sit upright unsupported and hold on. Single riders only.

Wheelchair Access: Use the Entrance. Rider must ascend stairs.

Wave Pool

This wave pool has very powerful waves that cycle on and off from time to time. The pool has a ramped zero-depth entrance. Maximum depth 5 feet.

Height Requirement: Those under 48" tall must wear a life vest.

Physical Requirement: A, B, C, D, E, F (see symbols below). Swim diapers are required for all those who are not toilet trained. Weak swimmers should stay in the shallow end of the pool. Waves start after a warning alarm is sounded.

Wheelchair Access: Use the Entrance. Pool has a ramped entry.

** A Responsible Person meets the criteria to experience the ride and is able to ensure that the child remains properly seated and follows all the rules of the ride.*
